

SHARE SUPPORT

Own and personal

Share SUPPORT maintains the individual and personal character of securities ownership. The value of securities to which an individual owner is entitled will in no way and never depend on the value of securities owned by other owners. There will be no mixes, mix-ups, "soup sandwiches" and other "communal" or partner solutions. The owner will not join any community or company, or enter into any legal relationship with other owners, except with VZMD only.

Proven

The exercising of rights from securities transferred to Share SUPPORT will be conducted by the PanSlovenian Investors' & Shareholders' Association ([VZMD](http://www.vzmd.si)), which has more than a 10-year tradition on the Slovenian capital market, and skills demonstrated in legislative and related procedures as well as in numerous public limited companies. Thus far, VZMD has successfully represented more than 150,000 shareholders in hundreds of different cases. VZMD is a long-standing full member of all related international associations and actively engages in their activities also by participating in executive boards - among others, of the European Federation of Investors and Financial Services Users ([Better Finance](http://www.betterfinance.eu)), and the World Federation of Investors ([WFI](http://www.wfi.org)).

One responsible

The securities transferred to Share SUPPORT will be legally separated from VZMD's securities as they will be registered on a special (fiduciary) account of a selected attorney. Therefore, the securities will be protected from potential other creditors of VZMD or the selected attorney.

Rational

To participate in Share SUPPORT, the owner who is a minority shareholder will pay a fee, which is guaranteed to be, in the long-term, the lowest possible for the maintenance of the securities ownership on the Slovenian capital market, therefore as many as possible minority shareholders will be able to decide to keep their shares.

Active

By participating in Share SUPPORT, owners will receive active support in exercising the rights and interest arising from their securities as well, including competent representation at general meetings, announcing and carrying out disputes for the protection of owners' rights (legal and other proceedings), and exercising other management rights regarding securities.
